

KH ROBERTS[®]

FOOD FLAVOURS

Delivering Pure Aromas

Beyond Simple Aroma

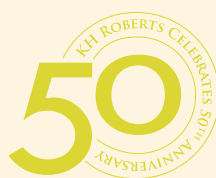

Economic developments and improved living standards have driven consumers to expect more out of their food selection and in much the same way, manufacturers expect more out of their food ingredients. With improved technology and innovation, food flavour sophistication has since advanced and food flavours can now perform beyond basic aromatic functions.

Balanced Aroma and Mouthfeel

KH Roberts[®] Food Flavours represents a range of unique and all-time favourite flavours, masterfully crafted and blended with the finest ingredients to bring out the best aromatic and flavourful profiles. KH Roberts[®] has also developed a range of specially formulated, next-to-nature flavours to replace the use of common ingredients prone to commodity price fluctuations, like cocoa powder, sugar and butter. This select range of flavours provides a reliable hedge against unpredictable price swings while maintaining the fine balance between product aroma and mouthfeel.

Applications

KH Roberts[®] Food Flavours delivers next-to-nature aroma performance into a wide range of applications including baked goods, dairy products, beverages and confectioneries. Take the challenge and start tasting the goodness today!
